1.0 INTRODUCTION

1.1 PURPOSE

The purpose of this article is to describe the methods to configure and integrate **Fortanix Data Security Manager SaaS (DSM SaaS)** solution with a **ServiceNow instance for Customer managed encryption keys**.

1.2 INTENDED AUDIENCE

The intended audience of this document includes Fortanix Sales Engineers, Field and Technical Support Engineers, and Customer Architects and Engineers who want to learn and understand how to implement the Fortanix DSM with ServiceNow.

2.0 FORTANIX DATA SECURITY MANAGER

Fortanix DSM is the world's first cloud solution secured with Intel® SGX. With Fortanix DSM, you can securely generate, store, and use cryptographic keys and certificates, as well as secrets, such as passwords, API keys, tokens, or any blob of data.

3.0 PREREQUISITES

- An account on Fortanix DSM SaaS.
 - ServiceNow instance with Database Encryption and Customer-Controlled Switch feature. Refer <https://docs.servicenow.com/bundle/tokyo-platform-security/page/administer/encryption-database/concept/dbe-css.html>
-

4.0 SETTING UP SERVICENOW INSTANCE

Please refer to ServiceNow documentation on how to set up your ServiceNow instance and enable external KMS functionality.

5.0 SETTING UP THE FORTANIX DATA SECURITY MANAGER

1. Sign up at <https://smartkey.io/>.
 2. Log in to the Fortanix DSM UI.
 3. Click the **Integration** tab in the left panel.
 4. On the Integration page, click **ADD INSTANCE** on the ServiceNow wizard.
-

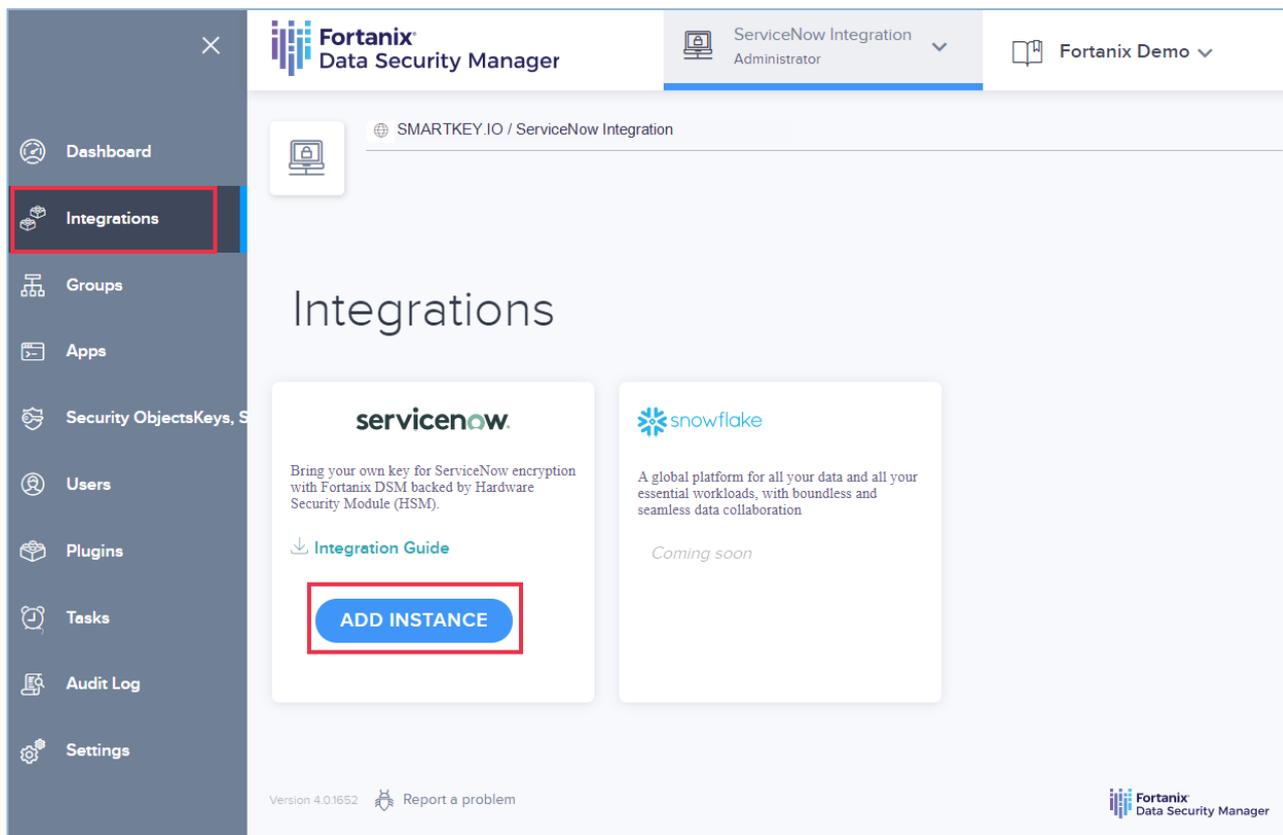

FIGURE 1: INTEGRATION TAB

5. Enter the details as shown in the following screenshot.

The screenshot shows the Fortanix Data Security Manager interface. The left sidebar contains navigation options: Dashboard, Integrations, Groups, Apps, Security Objects/Keys, Users, Plugins, Tasks, Audit Log, and Settings. The main content area is titled 'Instances' and shows the configuration for a new instance. The 'Instance Name' field is filled with 'Instance1'. The 'Key expires after' field is set to '2 days'. Under the 'API Gateway' section, the option 'Use Fortanix Managed API Gateway (https://servicenow.fortanix.com)' is selected. At the bottom right, there are two buttons: 'CANCEL' and 'SAVE'. The 'SAVE' button is highlighted with a red rectangular box.

FIGURE 2: SERVICENOW DETAILS

- a. **Instance Name:** This is your active ServiceNow instance name. Please provide the exact instance name. Any error in the name may result in unsuccessful integration.
 - b. **Key expires after:** Enter the period after which the key expires.
 - c. **API Gateway:** Use Fortanix managed API gateway. Option to set up your own API Gateway is coming soon.
6. Click **SAVE** to complete creating the application.
 7. You can view all the instances by clicking **View All** on the integration wizard.

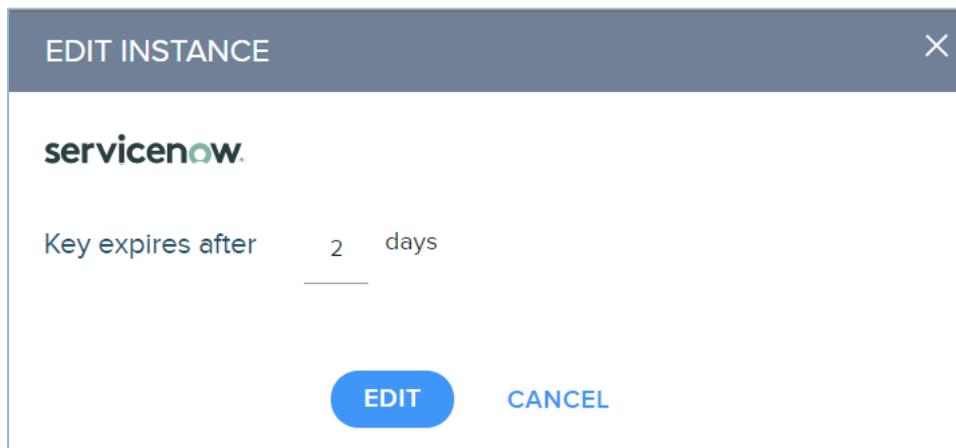

FIGURE 5: EDIT KEY EXPIRATION PERIOD

9. After the setup, please contact ServiceNow support (support@servicenow.com) and provide your endpoint in the following format:

https://servicenow.fortanix.com/kek/<instance_name>/<key_version>.

The service now Support team will then enable the Customer Control Switch for your instance.
