

## RELEASE NOTE

**Date:** 6-Apr-23

**Subject:** Software changes, updates, bug fixes, etc.

**Software:** Fortanix Data Security Manager

**Version:** 0.5.24

## OVERVIEW

This document provides an overview of new features, general enhancements, improvements, and resolved issues in the Fortanix Data Security Manager (DSM) - Terraform 0.5.24 release.

## NEW FEATURES

- Added support for creating and updating Key Access Justification policy when creating security objects for Google Cloud EKM (**JIRA: PROD-4928**).

## BUG FIXES

- Fixed an issue where the user was unable to create RSA and EC keys in an Azure-backed group (**JIRA: DEVOPS-3349**).

## KNOWN ISSUES

- Creating security objects of type DSA, KCDSA, EC-KCDSA, and Tokenization is not supported (**JIRA: DEVOPS-3110**).
- Setting the enable or disable options while creating security objects does not take effect (**JIRA: DEVOPS-3110**).
- Deletion of the Key Access Justification policy for security objects for Google Cloud EKM is not supported (**JIRA: DEVOPS-3806**).
- Issues in updating the security `dsm_subject` (**JIRA: DEVOPS-3668**).
  - Unable to update the security object's group.
  - Unable to set an expiration date after the security object is created.
  - Unable to deactivate, destroy, or delete a security object.

## RELEASE NOTE

**Date:** 6-Apr-23

**Subject:** Software changes, updates, bug fixes, etc.

**Software:** Fortanix Data Security Manager

**Version:** 0.5.24

- Terraform will detect changes when an approval policy, HMG, or cryptographic policy is added to a group, even when nothing is changed in the TF Body. **(JIRA: DEVOPS-3667)**.
- When you invite a user to a Fortanix DSM account as an account member and add this user to a group as a group administrator using the `dsm_group_user_role`, even though the user has not accepted the invitation to join the account, the user will still fail to be added to the group **(JIRA: DEVOPS-3666)**.
- Unable to update the DSM group name if the `dsm_group` resource contains an `hmg` parameter **(JIRA: DEVOPS-3736)**.
- Issue with deleting an account-level quorum policy **(JIRA: DEVOPS-3737)**.
- Unable to add quorum policy to externally-backed DSM groups using Terraform script **(JIRA: DEVOPS-3825)**.
- Terraform detects change even when the Key Access Justification Policy is not updated **(JIRA: DEVOPS-3807)**.
